

Department of Economics

Our Mission

The mission of Economics Department is to equip its students with critical thinking ability as well as the capability to offer solutions to local and global issues through micro and macro analysis. This department introduces the students with necessary knowledge and the technological opportunities which are fundamental to fully comprehending the reasons behind daily economic events as well as analyzing and creating solutions accordingly through the complexity of economics.

Making a Difference in Education

In 2014, Department of Economics was accredited by FIBAA accreditation organization which confirms the quality of this department in education by maintaining the target of adjusting to the everchanging international developments. The program in economics strengthens the potentials of the future of its students as well as their career possibilities through knowledge in economics, finance and management.

Technical Facilities

In our department, there are 4 laboratories equipped with latest softwares supported computers available for access to each and every student. Additionally, one laboratory contains broad data from the data bank of the Reuters DataStream. Each of our classroom is equipped with overhead projector backed computer. The structure of the buildings and classrooms enables equal access of education to the students with disabilities.

Career Opportunities

The qualities gained by graduating in Economics Department are among the most required in public and private sector recruit. Furthermore, due to lectures being conducted in English language, our students become qualified with ease of work for international organisations and businesses. Graduates of Economics Department now work for various central banks, local and international commercial banks, African Development Bank as well as various universities of Turkey, United Kingdom, Canada and North Cyprus, local banks and their branches, multinational companies and international consulting offices.
