RESEARCH INTERESTS

My major research fields are economic growth, financial development, finance, and econometrics (mainly time series analysis). My current research interests have evolved from my PhD research on economic growth such as testing the neoclassical growth models (i.e., the Solow and Augmented Solow models), the role of trade and government policies, and the disaggregated investment in a neo-classical modelling framework for small island economies. My current work on quantitative modelling using mathematical programming and econometrics finds many applications in the fields of finance and macroeconomics economics. I am currently working on examining financial development, openness convergence, productivity, foreign direct investment, underground economies, financial crises issues and economic growth by using advanced econometric techniques.

TEACHING

I have a wide range of teaching experience including undergraduate and postgraduate teaching. My areas of specialisation are Finance, Quantitative Methods, Operations

Research, Production Management and Econometrics for Management and Economics, Managerial Economics, and Applied Microeconomics.

1997 – 2005 June; University of Leicester, Management Centre

I have experience in teaching Financial Modelling course for both the ULMC MSc Full time and Distance learning (DL) students.

Teaching Computing for Data Analysis courses: Excel & SPSS for FT MSc Marketing, and Excel & Microfit for FT MSc Finance programmes.

Marking DL assignments and exam scripts: Decision Information Sciences (MBA module) and Financial Modelling (MSc Finance module).

Students have consistently rated the entire practical course highly. For instance, in 2003, 92% of respondents in the class either agreed or strongly agreed to a positive evaluation of the relevant course I had taught and in 2004 I had the highest evaluation score in the term with 93% for computing practical sessions of Financial Modelling.

2005 September- present; Eastern Mediterranean University, Department of Business Administration

I have also experience in teaching Managerial Economics, Investment Management, Portfolio Management, Operations Research, Operations Management, Production Management, Finance, Research methods in Economics and Business studies, Applied Microeconomics and Information Technology courses for both the undergraduate and postgraduate students.

Teaching Portfolio Management, Operations Research, Operations Management, Production Management, Research methods in Economics and Business studies and Information technology courses for undergraduate students.

Teaching Managerial Economics as well as Research methods in Business studies courses for postgraduate MBA students. Also teaching Applied Microeconomics and Contemporary Research Method for PhD. students. These courses are supported by Microfit 5.5 and Stata 16.0 statistical package programmes.
